Re: Household Methane Gas Detector Inspections for the Centre Street Landfill and the Professors Lake Landfill

As you may know, each year the Region of Peel conducts inspections of residential methane gas detectors which are installed in households situated behind former landfill sites. These inspections are required to ensure the gas detectors are operating properly.

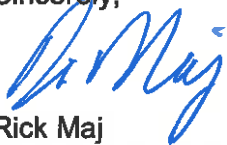

On Saturday, November 25, 2017, Region of Peel staff will visit your household to conduct this annual inspection, between 10:00 a.m. and 4:00 p.m. Staff will be wearing identification.

Region of Peel staff will require access to the detector in your household for several minutes. If any problems are found with the detector it will be replaced during the inspection at no cost to you.

If you are unavailable on Saturday, November 25, please contact me at 416-529-7531 or via e-mail at rick.maj@peelregion.ca to schedule an appointment for another date.

Thank you for your co-operation. Please feel free to contact me if you have any questions regarding the inspections.

Sincerely,

Rick Maj
Technical Analyst
